EXCELLENCE EXPERIENCED

CONTRACT ASSEMBLIES

- Cable Assemblies
- Complex Wire Harnesses
- Interconnect Overmolding
- Electromechanical Assemblies

ENGINEERED ASSEMBLIES

- Controls & Automation
- Specialty Purpose Panels
- Custom Equipment Integration
- High Pressure Gas Compression Equipment

MRO SERVICES

- Commissioning
- Field Service
- Overhaul
- OEM Replacement Parts

OUR FAMILY NOW INCLUDES

ATron**CS** COMPRESSION SYSTEMS

- Helium (H2) Compression Solutions & Equipment
- Natural Gas (NG) Well Head Solutions & Equipment
- Compressed Natural Gas (CNG) Fueling Solutions & Equipment

Standard**Controls**™

- Mission Critical Power
- Low Voltage Switchgear
- Medium Voltage Switchgear
- Process Controls
- Motor Controls
- Engineering
- Contract Manufacturing

Standard**Fab**™

- Engineering & Design
- Laser Cutting
- CNC Punching
- Forming & Rolling
- Welding
- Tube Bending
- Finishing
- Assembly

- Motor Controls
- NEMA & IEC
- Simplified Configuration
- Compare Brands by Price
- Discounts by Industry & Volume

REDRHINO

- High Security Cabinets
- Electrical Utility Relay Racks
- Custom Cabinets

RHINOEXP

- Expedited Explosion-Proof Enclosures
- Class I & II, Division I & II
- On-site Precision ModShop
- Wiring / UL Builds

Announcing Our Acquisitions

June 30, 2017

RE: AssembleTronics llc Acquires Standard Controls and its affiliates Standard Fabrication and Motorstaters.com

To our customers, staff and suppliers,

In 2016, Bob Potysman, President and CEO of AssembleTronics, and Jon Loshinsky, CEO of Standard Controls Inc., were introduced to one another by a mutual business associate who observed that both men shared a common corporate and personal values system. As Bob and Jon met, they began sharing their vision for building and operating a thriving high-quality manufacturing business in today's challenging global marketplace. The culmination of their discussions was the consolidation of their business interests. On June 16, 2017, AssembleTronics purchased the assets of Standard Controls Inc. which included the ongoing operations of Standard Controls, Standard Fab, MotorStarters.com and the Rhino brand of enclosures and racks. The knowledgeable and skilled staff members of all divisions were also retained. Bob Potysman is the Owner, President, and CEO of AssembleTronics. Jon Loshinsky will stay on providing leadership and technical expertise to the Mission Critical Power Division, Sales, Operations, and Strategic Business Development.

On Monday, June 19, all operations from both entities were consolidated into the Standard Controls 55,000 square foot manufacturing facility located at 9125 Viscount Row in Dallas, Texas. Bob Potysman shared, "We are very excited about the possibilities for serving all our customers with greater depth and breadth of capabilities. It has been exciting working with Jon to create and refine our shared vision". The transaction results in the wealth of complimentary core competencies and values coming together under one roof — a united team that is committed to protecting our clients' brands by delivering excellence in manufacturing. We have prepared the attached company overview to help better illustrate our collective service offerings.

AssembleTronics, (ATron), is a manufacturing services company with emphasis in three key areas: Contract Assembly, Engineered Products, and MRO (Maintenance, Repair, and Overhaul) Services for industries including Aerospace, High Pressure Gas Compression, Oil & Gas, Communications, Automotive, Medical, Electronics and other Industrial Manufacturing. ATron runs the business, produces high quality outcomes, and eliminates risk through exacting execution under their AS9100 and ISO 9001 Quality Management Systems. All Standard Controls and Standard Fabrication product offerings will be incorporated into the ATron quality program within 90 days.

Now, as part of the AssembleTronics family, Standard Controls will continue to provide control systems integration, process controls, motor controls, engineering services and contract manufacturing services. Standard Fabrication will also continue to provide precision metal fabrication, engineering, prototype parts and production runs of all sizes.

We look forward to taking this next giant step in fulfilling our mission to 'Protect stakeholder brands while delivering an unmatched, extraordinary experience.' We believe that the people we are bringing together have the talent, passion, and expertise to deliver an excellent experience to the customers of both companies.

If you should have any questions, please do not hesitate to call one of us at (214) 292-9840. We look forward to continuing to serve you.

Sincerely,

A handwritten signature in black ink, appearing to read 'R Potysman', with a long horizontal flourish extending to the right.

Bob Potysman
